

# 5 Crypto Hardware Wallets

# Security of your assets, the hard choice...

You may have heard that the best way to secure your crypto assets is in a 'Hardware Wallet', which we also believe to be true. So, without further ado, let's list some of the most popular consumer choices.

**Nat Cole**

#1

## Ledger Nano S or X

Ledger is among the most trusted of crypto hardware wallet companies.

The most popular of their products are the Ledger Nano S and Ledger Nano X. The latter supporting Bluetooth connection and also expanding on the earlier manufactured Nano S.

Ledger is also one of the oldest crypto hardware wallets, with the company launching in 2014.

Ledger comes highly recommended in the hardware wallet ranks!

#2

## Trezor

Trezor, is again one of the most used and respected crypto hardware wallet manufacturers.

Their signature wallets include the Trezor One and Trezor T, the latter featuring a full colour screen and the inclusion of native support for more currencies than it's little brother. However, the Trezor One is described as the Gold Standard of crypto hardware wallet devices.

You can check out both Trezor models using the link below.

#3

## SafePal

Although this is the youngest company in this list, SafePal has certainly gone leaps and bounds into creating an easy to use, stylish crypto wallet.

In our opinion SafePal is a very good wallet solution for starters and is packed with DeFi enabled features as well as being a secure choice of hardware wallet.

Currently (2021), SafePal have launched with just one version of their wallet, the SafePal S1.

Check out the SafePal wallet below.

#4

## KeepKey

Joining the first two participants of our list ,in similar age, is the KeepKey hardware wallet.

Keepkey is marketed as being the "simple" Bitcoin wallet and although holding less types of cryptocurrencies than the others on this list, the wallet has two very unique feature for newcomers:

- Large display interface
- Commission free trading via Shapeshift.io

If you're looking for simple and not interested in other features, the KeepKey may be the one for you.

#5

## Ballet

Although being different from the others on this list, in terms of not being a USB device. The Ballet wallet is something that we tested during its beta.

Ballet borrows from the Paper Wallet concept, with a slight twist...they're made from various types of metal, from solid steel to 24k gold!

According to Ballet.."By intention, Ballet cryptocurrency wallets were designed to be without any computer chips or electronics circuitry. Computer chips and electronics circuitry present a vector for electronic or online hacking..." Check them out below.
