6-steps to Crypto Copy Trading with Binance & Shrimpy

By Nathaniel Cole

BTC Bros

Enjoy the gains from Crypto trading, without the fuss of watching the market all day!

So your trying to trade in the Crypto & DeFi markets, but you don't have a clue where you can copy trade experienced traders...or maybe you just have not got the time to keep track of the 0000's of Cryptocurrencies, not to mention DeFi tokens!

This guide will show you how you can find a trusted crypto exchange, copy trading platform and a good trader to copy, putting your Bitcoin to work, instead of you!

There's even a bonus link at the end to easily copy trade on the top 50 DeFi tokens and take your profits in Bitcoin…well, what are you waiting for?

Read on!

Step 1

Create an account at Binance.com

The first thing you will need to do is set up a Binance trading account.

Binance is the worlds largest cryptocurrency exchange with more than 1000+ cryptocurrencies and stable coin pairs. You can even use your debit/credit card to purchase via their FIAT gateway!

Here's 4 steps to creating an account:

- Navigate to https://binance.com (Use the link or QR code in this guide to get a 30% rebate on your first deposit!)
- 2. Enter your Email address and create a password
- 3. Head over to your Inbox and confirm your email address
- 4. Complete Binance KYC, following the steps to upload your ID and confirm your identity

Create a Binance Sub Account (Optional)

After creating a Binance account, an optional step is to create a sub-account. We do this so that our trade copying does not interfere with our day to day trades.

Here's how to activate your sub account

Step 2

- 1. Click on your Binance account profile
- 2. Click 'Sub Accounts' at the bottom of the left hand side menu.
- 3. Give your sub account an email, or create a Binance virtual email
- 4. Transfer some BTC from your main account to your new sub account

Note: You must be a VIP level 1 member to create a Binance sub account. If you do not meet the requirements, you can register a second account with another email to separate your day to day trading profile.

Step 3

Create a Shrimpy.io account

Before you can start to copy trade your way into crypto paradise, you'll need to create a Shrimpy account.

"Shrimpy is the simple portfolio management website for the busy person. Shrimpy adapts ideas from smart investors outside of crypto to introduce simple automated strategies which can help increase returns." — *Shrimpy.io*

- 1. First, navigate to Shrimpy.io using the link at the end of this guide
- 2. Enter a valid email address and create a password
- 3 Check your email for the confirmation link, to confirm your account
- 4. When asked to "connect exchange", **follow step 4** in this guide

Step 4

Get your Binance API keys

Before Shrimpy can apply copied trades to your account, you will need to connect your Binance account via your Binance API keys.

Here's what you need to do

- 1. Login to your Binance Account
- 2. Navigate to your account profile
- 3. Select 'Settings>API Management' from the left hand menu
- 4. Give your API keys a label and click create API
- 5. Ensure the **only** permissions allowed are **'Enable Reading'** and **'Enable Spot & Margin Trading'**
- 6. Copy your API Key and Secret Key to the relevant fields on Shrimpy and your ready to go!

Bashboard							
D Payment	API Management						
J Security	Label APS key to proceed						
		Create AP1					
Reward Center							
Task Center							
⊊ Settings	API List				t	Delete all API	
Basic Info							
API Management	Shrimpy				Edit restrictions	Delete	
Preferences							
5* Referral		AP1 Key					
Sub Accounts	0		Сору				
		Secret Key					
		API restrictions					
		Enable Reading	🗵 Enable Spot & Margin Trading	Enable Withdrawals			
		Enable Internal Transfer	Enable Margin	Enable Futures			
		Permits Universal Transfer	Enable Vanilla Options				
		DP access restrictions:					
		Unrestricted (Less Secure) This API key allows					
		Restrict access to trusted IPs only (Recommer	ided)				

Start Copying

Now you've fully set up your account its time to find a trader to copy.

Shrimpy traders are called **'Leaders'**, to copy they're portfolios and strategies you will need to **'Follow'** them. On Shrimpy you can create multiple portfolios if you want to copy more than one leader.

As we can see below our leader **'Rags'** looks as though he has a stable portfolio, so we'll follow him, but remember you can follow anyone you want to, this is not an endorsement of any leader profile on Shrimpy. **The consideration of who to copy is entirely your choice.**

Monitor your portfolio

Congratulations! You are now copy trading cryptocurrencies with Shrimpy and Binance!

You can monitor your portfolio at any time by selecting it in the top left corner of the Shrimpy dashboard.

Happy Trading!

REMEMBER: Cryptocurrencies are volatile assets and come with a high risk of losing money rapidly. 70% of investor accounts lose money when trading cryptocurrencies. You should consider whether you understand how trading works, and whether you can afford to take the high risk of losing your money.
