

Ultimate Way To Create Wealth

Lucky Pradhan
Founder of Pet to lives

1

Consumerization Preventing us from Wealth Creation

- From childhood till today we were being taught to be a consumer instead of being a owner/ Author. A few of us were taught about financial knowledge and they create wealth.
- We only spend money buying liabilities not by buying assets. Buy assets and from it what income you get use them for expenses.
- You must have seen that Rich are getting Richer. The logic behind it is, they understand the world in a way of an authority.

Investing in Yourself is another way to create wealth

- Investing in yourself will give you results that even you can't think of.
- Make a habit of saying 'No' to stuffs that don't give you value or productivity. Stop yourself from doing things that are not for your improvements, in stead use your time to make better from yesterday.
- Just for an example, an average person spends at least 4 hours a day watching movies, mobile etc. Think if he will invest in himself what will be the result.

Life Long Learner

- Always be in attitude of "I am a **Seeker, Learner, & Student**". Be a life long learner because learning and gaining knowledge is a process till death.
- Learning different things from different sources improves your self confidence and ability to do things perfectly and hence increases your productivity.
- You can read books, listen audio books, read Positive mental attitude stories, auto-biographies, learn from mentors.

Save & Invest Money

- Can you imagine, in which proportion our expenses are increasing day by day. But the value of money remains same. For example 5 years before a 'Badapao' costs 5 rupees but now it is 10 rupees. Value of things increasing day by day but our income is still same and not increasing in that proportion.
- Every ten year their is an inflation of 10 X times expenses for a family for easy living. In future you must have to acquire that much amount to face the inflation rate.

Guru mantra

"Saving and Investing is essential to face the inflation rate"

Ensure that you must be investing 20% of your income.

Impact Others

- Wealth creation is a byproduct of what impact you make in others.
- The more masses you impact on, the more wealth you can create.

"It is simple but not easy"

- If you are being paid on the basis of what value you are giving not by how many hours you are working then only you can create wealth. Otherwise we can work maximum 10 hours a day.(more productively work 3 hours a day)

1

Willingness to serve

2

Acquire the ability to serve

Updation

- You must observed how many times your mobile applications are getting updated. They always work on updating to flow the changes focusing what changes will occur in future.

Guru Mantra

'It's not a problem where are you in now, but after 5 years from now where you will be is a big problem.'

Bonus

As earlier I have said,

"The problem is not you don't know, but the problem is you don't know what you don't know"

Finally I am going to share with you top secrets that are ***Real Long Term Problems***:-

- **Single source of income is a long term problem.**
- **Not building the vital 21st century skills is a long term problem.**
- **Not having social media presence is a long term problem.**
- **Doing what doesn't excite you is a long term problem.**
- **Exchanging time and not value for money is a long term problem.**
